

Company Profile

Company history and products portfolio

WRX Slovakia recent portfolio is as follows:

WRX Slovakia Limited is authorized distributor and sales channel of well established manufacturers and industry leaders. Our portfolio includes terrestrial and satellite radio communication and videoconferencing systems.

The brand WRX trade in Slovakian market since its establishment in 1990. In first phase our portfolio was dedicated exclusively only to Motorola products (data communication devices such as modems, routers, wireless LAN; Motorola RISC computers; professional two-way radios, paging infrastructure and subscribers and telepoint systems as well).

In the middle of 90's we finally received nationwide paging license for POCSAG paging network called BEEPAGE. In 1998 we separate BEEPAGE from WRX to dully act as independent national paging operator. In 2000 WRX was restructurealized to today's WRX Slovakia and we add non-Motorola vendors includes TAIT Electronics, VTEL Products Corporation.

Terrestrial Radio Communication

We recently distribute, support and service products of TAIT and Motorola CGISS. This includes professional conventional and trunking two-way radios and networks. Motorola business is usual daily box-providing business while TAIT is dedicated to complex customers solutions, such as trunking sites and special intrinsically safe radios for blast environment.

Satellite Communication

We offer satellite subscribers and services includes airtime for relevant world satellite networks. These are IRIDIUM, GLOBALSTAR, THURAYA and INMARSAT as well.

Videoconferencing systems

These are videoconferencing boxes and gatekeepers from VTEL and RADVISION as well.

During the years of business we supplied to top clients not only devices, but provided them with support as well. Our customers includes:

ZSE - Western Slovakia Energetical Enterprises
Slovenská sporiteľňa, a.s. - Slovak Savings Bank

The deal to Slovak Savings Bank was for about 1250 famous Motorola 326X modems includes Network Management System and support services. Their network build from modems supplied by us was considered as biggest private network in Slovakia for several years and was key project in Middle Europe.

We would like to underline that with each client we deal individually keeping in mind his individual need and requirement. We offer advices for solutions, arrange legislative needs if required, provide warranty and after warranty service, training and cosultation.

We standardly cooperate with local partners in order to secure physical installation of devices or special customer's requirement keeping supervisory over all operations and integration.

Over the dozen years in business we know your telecommunication needs. We would pleased to be your Global Communication Partner.

Reference

Terrestrial Radio Communication

Tait designs and manufactures professional radio communication solutions for mobile organisations. Products include MPT 1327 trunked networks, conventional systems, base stations, and portable and mobile radio terminals for voice and data.

*radio
communications*

A satellite is shown in orbit around the Earth, with a thick white line representing its path. The Earth is a large blue and white sphere. In the upper right, a cluster of yellow dots represents the Iridium satellite constellation. The word "IRIDIUM" is written in white capital letters next to these dots.

IRIDIUM

Iridium Satellite LLC is the only provider of truly global mobile satellite voice and data solutions. With complete coverage of the Earth's oceans, airways and Polar Regions, Iridium delivers essential services to users who need communications access to and from remote areas where no other form of communication is available.

Satellite Communication

Our service

Product Presentation and Test

We can present products directly on customer's site or upon acceptance visit referenced places to see devices in real time. We do not limit to Slovakian territory only. We can provide customer with test device in order to test in his/her real production environment.

Solution Proposal

In solution proposal we deal closely with customer needs, his/her requirement and budget. We wish to deliver best price/performance solutions in adequate price.

Project Design and Documentation

In case of radio business certain relevant legislative issues needs to be performed in order to use radio equipment in Slovakia. The legislative includes transmission approval, project documentation and other required tasks.

In case of data communication business we design network, optimize traffic and set security.

Delivery and installation

Upon terms of agreement we supply usually to customer's site and arrange installation there. In case installation if not performed by us we use professional organizations which core business are such services.

Training

We offer complex user, operator and administrator trainings for clients.

Warranty and after warranty services

We can offer standard manufacturer defined warranty or replacement unit service, or special over standard warranty includes several hours fix time on customer site. Please contact us for more details to meet your business requirement.

Standard warranty is performed directly in manufacturer's facilities. In order to meets customer's needs we can provide box switching replacement for faulty device as extra paid service - if not defined otherwise. If the manufacturer declare that warranty claim was inadequate customer has to bear related costs. The warranty terms and service condition can be negotiated on case-by-case basis in order to fully satisfy customer.
